

SAHETI SCHOOL

SAHETI SCHOOL, where Quality Education strides into the Future

SAHETI is a dynamic organization constantly striving to meet the needs of the society it serves. It must, therefore, embrace change and seek to fulfill the demands created by new education trends and the ever-challenging, ever-developing world of technology. For an educational institution to be effective it must acknowledge this reality and it must be willing to interface with it on a daily basis. It is imperative to create self-assured young adults who are well-equipped to face the unknown, unpredictable context they are about to enter – therefore, this is what the school strives to achieve. It is its priority to produce individuals who will invite transformation and approach it in an innovative manner, thus promoting progress. And this the school aims to achieve hand-in-hand with the teachings of Hellenism from the early stages of the Pre-Primary through to the academic and societal rigours of Grade 12. After all, the principles of Hellenism are universal and impact on all cultures and backgrounds. And this explains why so many non-Greeks frequent the school and find it a uniquely rewarding experience, be it in terms of academic, extra mural or social experience. We inculcate in our scholars an awareness of the precepts of humanitarianism and human rights, particularly through our Outreach Programmes.

The school is proud of our impressive academic record that reflects not only the efforts of its dedicated and highly experienced staff but also the sound work ethic of its students.

SAHETI offers highly qualified educators and coaches, excellent facilities, small classes, an outstanding range of subject choices and sporting/cultural activities, life skills programmes, full time counseling, motivational and leadership courses, educational tours and, generally, fun-filled school life in a supportive, caring environment. For several years, SAHETI has used the slogan “Imagine a school where your child always comes first”; for those whose children attend the school, there is no need to imagine this – for them, it is a reality.
